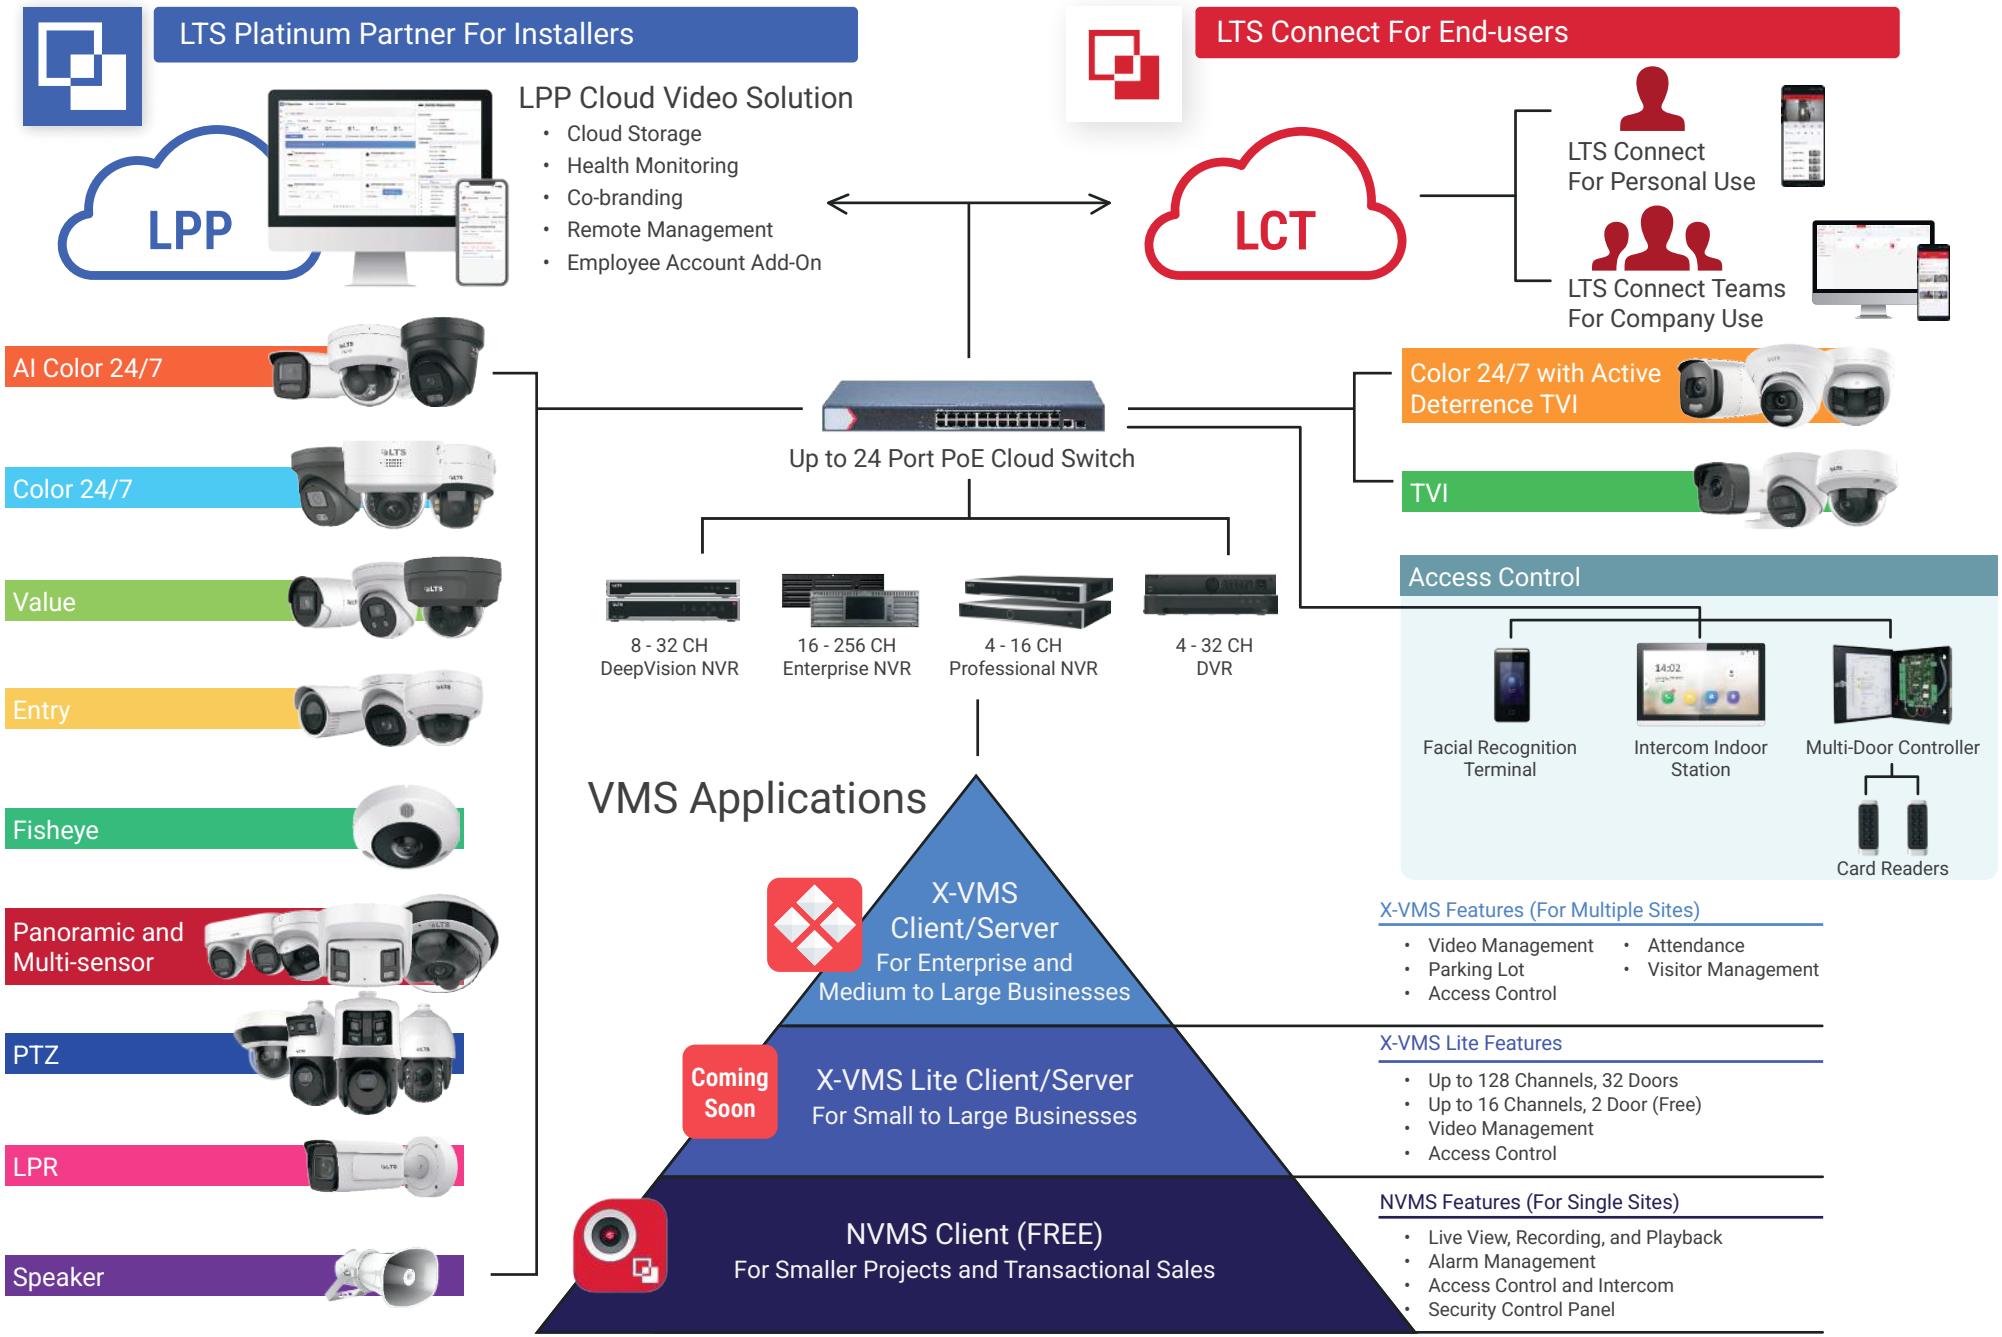
Platinum End-to-End Solution

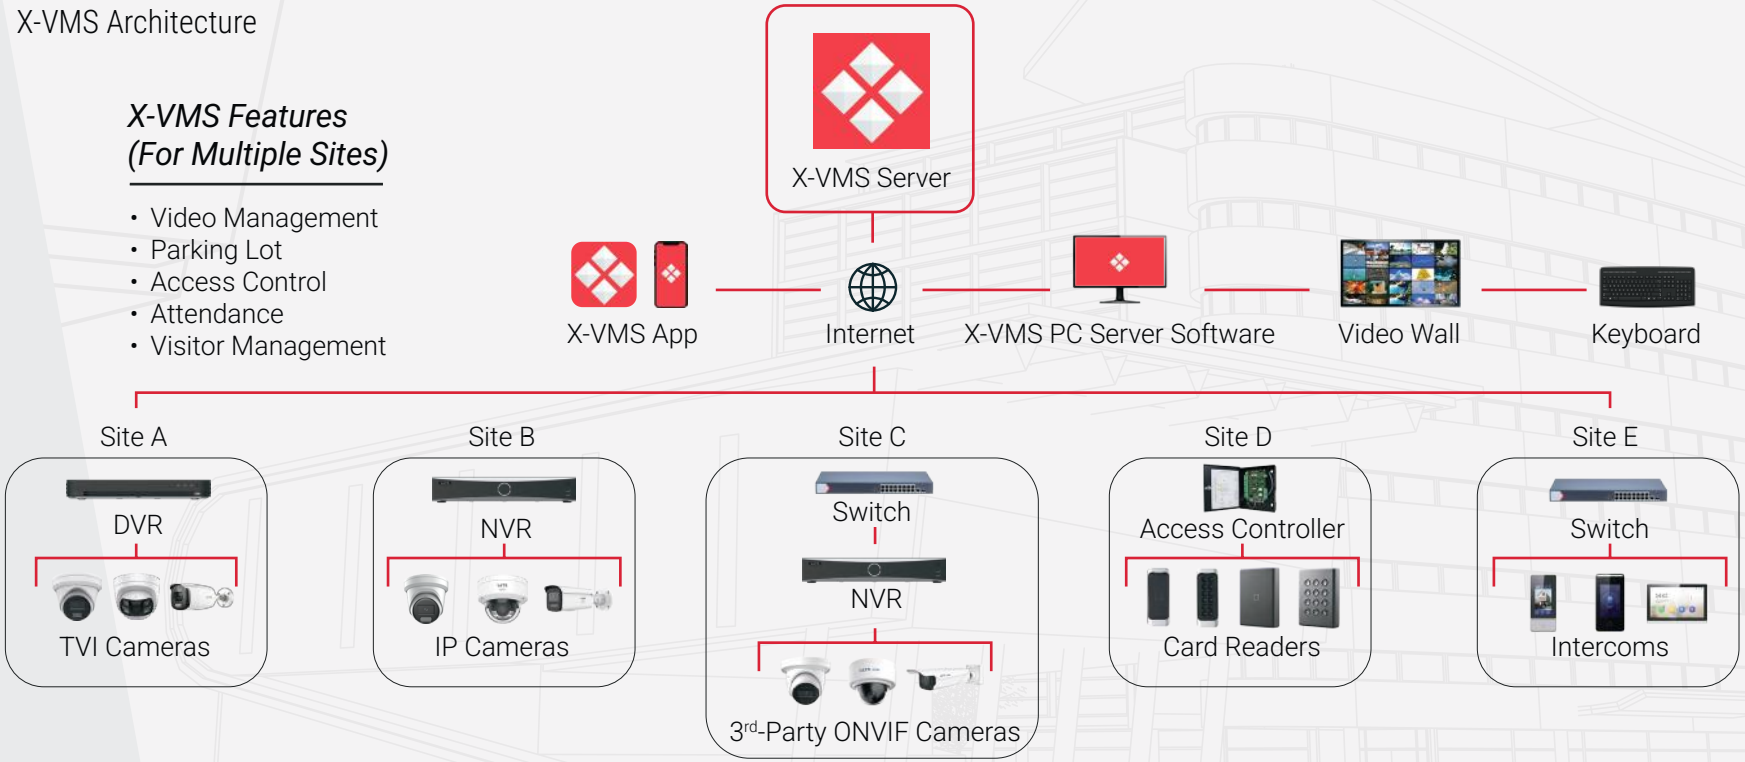


One Software Application for Total Control

X-VMS Architecture

X-VMS Features (For Multiple Sites)

- Video Management
- Parking Lot
- Access Control
- Attendance
- Visitor Management



Unified Control Across Sites

X-VMS lets you manage multiple locations, access control systems, intercoms and large groups of cameras/DVRs/NVRs — all from one centralized platform.

Always-On Health Monitoring

Stay in control with real-time and historical system health insights. Our intuitive dashboards make it easy to track device performance, pinpoint issues from the last 30 days, and ensure nothing goes unnoticed.

Mobile & Web Access Anywhere

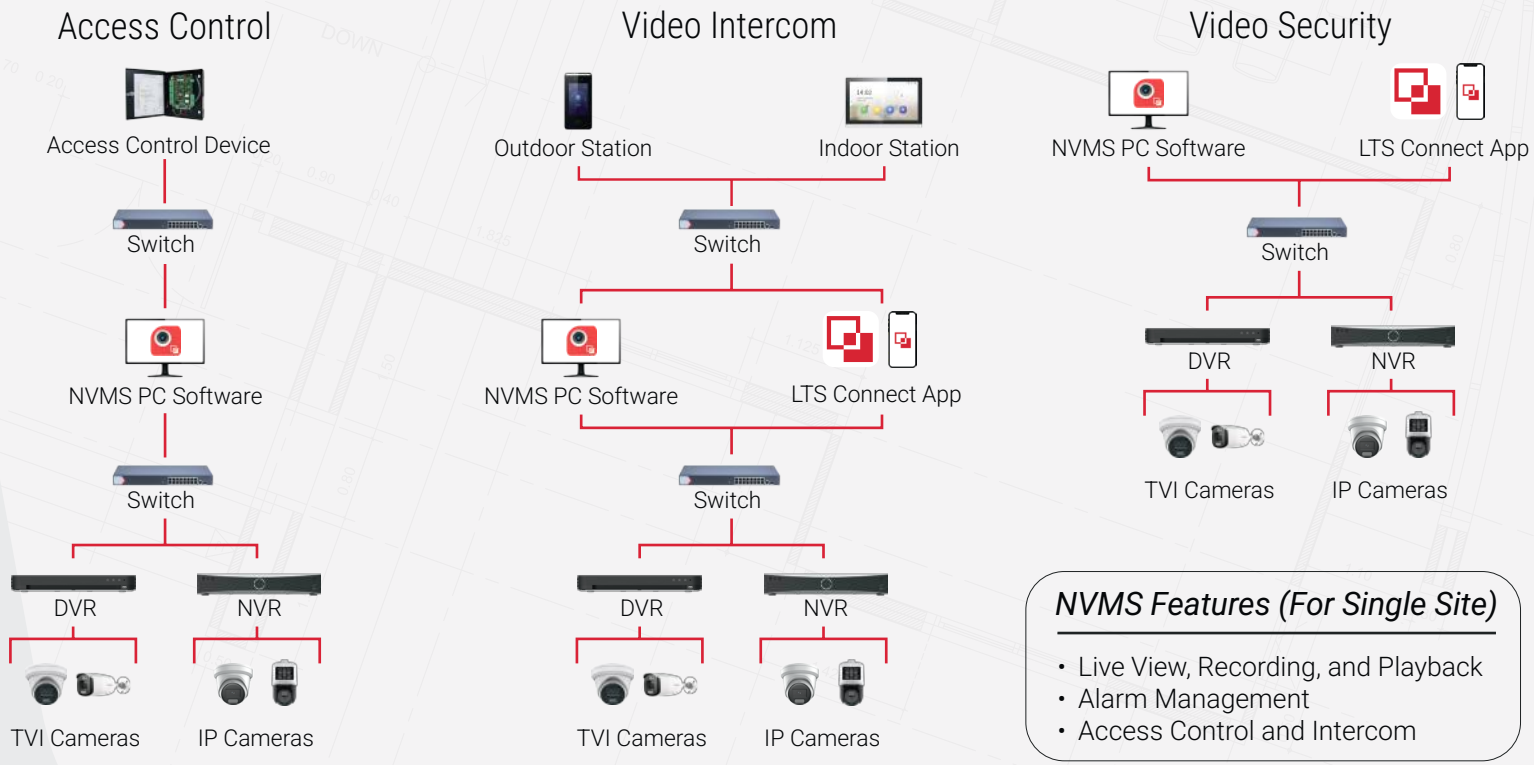
Configure, monitor, and respond on the go. Whether on smartphone, tablet, or browser, you stay in control.

Dynamic Viewing Modes

Designed for operational precision, our access control software supports versatile viewing modes such as live, panoramic, and grid layouts, enabling efficient surveillance management across diverse environments.

Control Without Compromise

NVMS Architecture Application



NVMS Features (For Single Site)

- Live View, Recording, and Playback
- Alarm Management
- Access Control and Intercom

Experience Pro Control for Free

Enjoy intelligent video search, smooth navigation, and seamless access management. All without the price tag.

Semantic Search Capabilities

Our access control system integrates with our DeepVision NVRs for Semantic Search, enabling faster and smarter investigation

Designed for Ease

NVMS is an intuitive software that puts full control at your fingertips with a clean design and simple navigation.

Built for Single-Site Control

Designed for single-site security, our software keeps everything simple, fast, and reliable.

LTS Platinum Partner (LPP) - For Installers

Cloud Solution that Boosts Marketing, Lowers Labor Costs, and Creates Recurring Revenue

LTS Platinum Partner

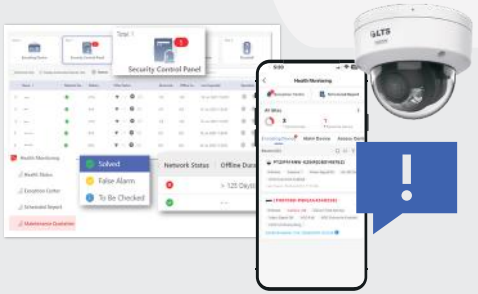
LPP Basic FREE Feature: Remote Management

LTS Platinum Partner For Installers

LPP allows installers to create sites and share permissions to other installers and end-users

The LTS Platinum Partner Cloud-based solution offers integrated marketing, revenue generation, recurring income, and cloud storage to streamline your business success. Read more below about how these premium paid add-ons can help you grow your business.

LPP Premium Features: Paid Add-ons



Health Monitoring

Installers can monitor device status and provide remote health management, including:

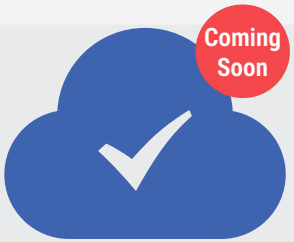
- Regular inspections for devices, HDDs, and network failures
- Prompt notifications and logs

Co-Branding

- Expand your company's reach with enhanced brand recognition.
- LTS promotes your business by showcasing your logo on the app, NVR interface, and reports, effectively engaging both existing and potential customers.

Employee Account Add-On

- Installers can add users to both new and existing CCTV systems, making it easy for employees to collaborate.
- Employees can be assigned different permission levels based on their roles and responsibilities.



Cloud-based Storage

- With cloud storage, installers can access video content remotely, reducing the risk of losing footage. We offer customizable storage plans.

LTS Connect Teams (LCT) - For End-Users

A user-friendly app designed to help installers access and manage CCTV systems with ease.

LTS Connect For End-users

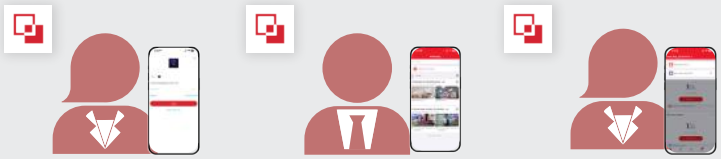
Easily access and manage CCTV system for live view, playback, and more

Team Mode

Small/Medium Business and Enterprise Level Users

- Video Management
- Access Control & Time Attendance
- Video Intercom
- Analysis Report

Gives permission to employees



Employee 1 Employee 2 Employee 3

Personal Mode

For Individual Access and End-users

- Live View and Playback
- Instant Alarm Notice
- Intercom Call and Remote Access
- Cloud Storage

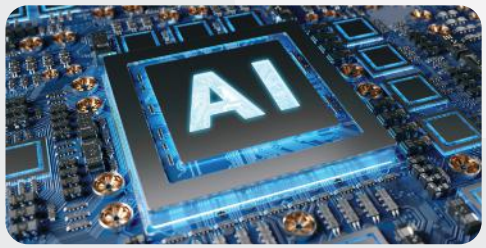
How LCT Works

With LTS Connect Teams, installers can work with team mode to give permissions to employees. In personal mode, employees can access the CCTV systems for live view, playback, alarm, and more. If an employee leaves the company, installers can change the permissions to deny access.

10X Better Color 24/7 Performance to Seal the Deal

LT Security proudly presents AI Color 24/7 cameras, which feature enhanced algorithms and features for outstanding visual performance. Prepare to improve your experience with high-quality images in low light, anti-corrosion housing, AI WDR, higher accuracy rate, enhanced audio, direct-search, and more.

Advanced AI-ISP Enhances Color Image Quality in Low-Light Conditions



The built-in AI chip brightens images, reduces noise, enhances color accuracy, and provides more detailed clarity. Additionally, this new technology supports color correction and matching. AI WDR improves clarity and detail in environments with high-contrast lighting.

Active Deterrence

The AI Color 24/7 cameras ending in -LAISP feature red and blue strobe lights, along with two-way audio, making them effective for deterring intruders.

Anti-corrosion NEMA 4X Housing for Harsh Conditions

The anti-corrosion NEMA 4X housing can withstand harsh environmental conditions, ensuring reliable yearly performance.

VCA 3.0 for Enhanced Accuracy

Minimize false alarms with our advanced human and vehicle detection algorithm. Combined with line crossing detection, our cameras help identify and alert you to unauthorized movements across defined boundaries.

Maximize Your Time with Faster, Easier Installation

The era of lengthy installation with traditional cameras is over. InstaDome reduces installation time by 5X thanks to its removable plate, cable management, and remotely adjustable lens. It also provides key features such as active deterrence and human and vehicle detection.

Remotely Adjust Lens

Rather than removing the camera to adjust wires and cameras by hand, you can remotely adjust the lens for pan, tilt, zoom, and z-axis via the app.

Active Deterrence

The InstaDome triggers a white strobe light to warn intruders once they enter the detection zone. You can also use the two-way audio feature to discourage unwanted visitors from trespassing.

Organized Cable Management

The InstaDome has a removable plate that comes off, revealing neatly arranged cables within the junction box, significantly reducing installation times by 80%.

VCA 2.0 Human & Vehicle Detection for Reduced False Alarms

With VCA 2.0, false alarms are significantly reduced by accurately distinguishing humans and vehicles from non-relevant objects, alerting you to genuine security threats.

Ultimate 5-in-one Instadome Camera

This camera features five multi-directional lens to protect you from all angles. Its greatest strength is the InstaDome technology for remotely adjustable lenses, which allows you to ideally adjust the five lenses to suit your installation site.

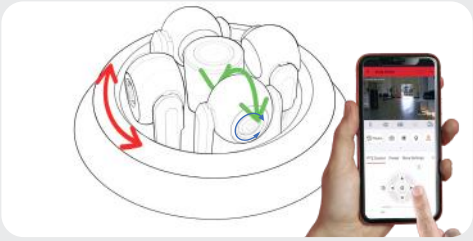
Versatile, Customizable Lens for Any Application

This camera has five lenses that are easily adjustable to cover angles such as 360° and 270° to secure your property from all angles. You can customize the lens configuration for different application settings, such as parking lots and corner buildings.

Save Labor Costs with One PoE Cable for Multi-lens Cameras

We are significantly reducing labor costs by utilizing a single PoE (Power over Ethernet) cable to support a camera with five lenses. This approach eliminates the need for five separate cables and cameras, streamlining installation and maintenance while improving efficiency.

InstaDome Technology



The camera has a removable plate and organized wire junction box, making installation up to 5X faster. Installers can remotely adjust the pan, tilt, zoom, and z-axis lens via the app to fit your installation site's pain points.

Blind Spot Protection

Unlike other cameras, this camera features a fixed lens at the bottom of the dome for a 360° FOV, enabling direct monitoring underneath.

Best of Both Worlds: Exceptional Detail and Wide Coverage

The panoramic PTZ camera, which features two separate cameras in one unit, is an excellent choice for monitoring vast areas. The 180° panoramic camera on top captures high-quality images of vast spaces. The PTZ camera below uses a 25x zoom lens to deliver detailed, clear

180° Wide Angle Coverage

The 180° panoramic camera covers vast, broad areas, making it perfect for applications such as roads, railways, airports, public venues, and more.

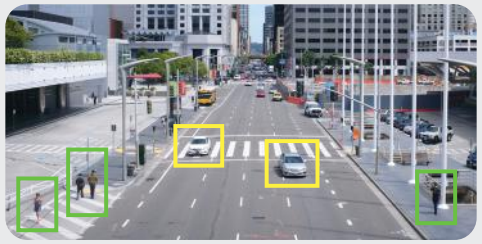
Save Labor Costs with One Installation

The panoramic and PTZ lenses offer coverage of multiple angles, making it a tremendous cost-efficient solution. A single PoE (Power over Ethernet) cable can support a camera with three lenses to save labor costs.

25x Zoom Lens for Long-Range

The PTZ camera below has a 25x zoom lens, which provides detailed, close-up images for tracking humans or vehicles.

Human & Vehicles Auto-tracking



This panoramic PTZ can zoom in and auto-track humans and vehicles, ensuring your property is safe in sensitive, restricted areas.

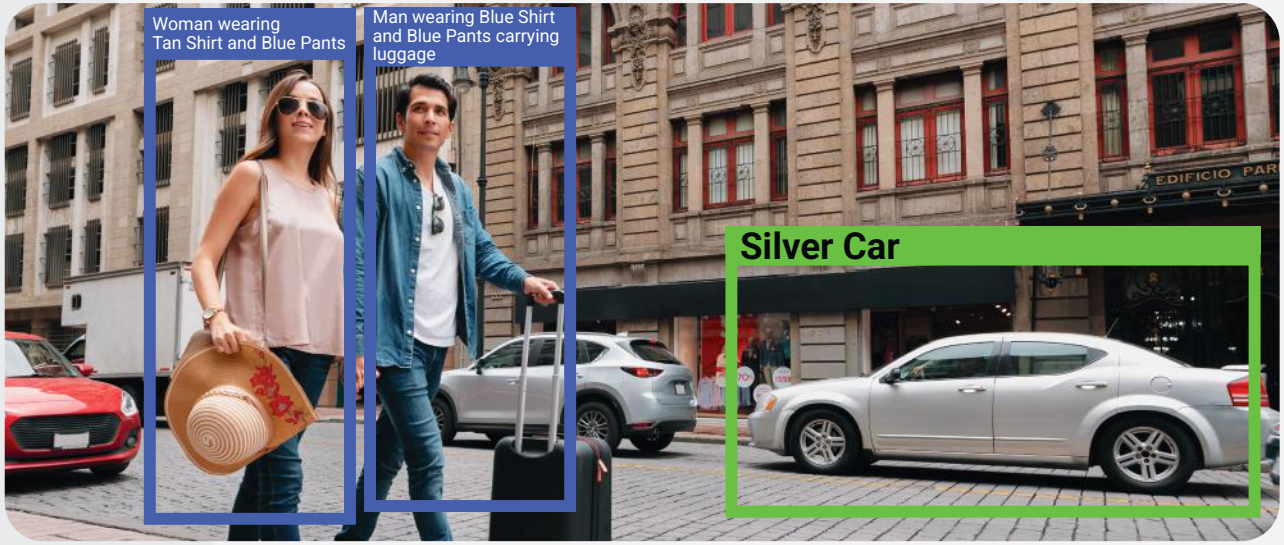
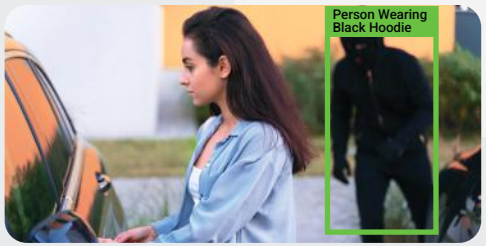
Find Moments in Seconds with Semantic Search



DeepVision NVRs deliver intelligent performance, seamless integration, and unmatched search efficiency. Designed for professionals who demand speed, accuracy, and reliability in every frame.

First Semantic Search NVR



As the first NVRs to integrate Semantic Search technology, DeepVision sets a new benchmark in intelligent video analytics and operational efficiency.

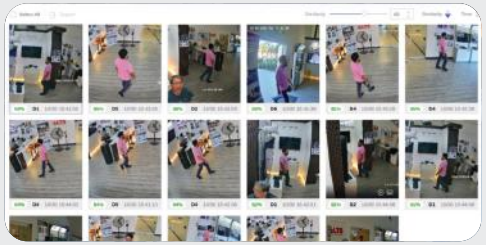
Intuitive Experience

Eliminate the need to manually review hours of footage. With Semantic Search, you can find subjects in seconds — simply enter a few descriptive keywords and let the system do the work.

Large Multimodal Model

Powered by a large multimodal model, images and text are mapped into a shared vector space for seamless interaction. This enables advanced capabilities such as descriptive text-based searches to find the exact moment you're looking for.

Accurate Results



Semantic Search intelligently interprets your keywords to deliver the most relevant results. Adjust the similarity score to refine your search — higher scores return closely matched footage, while lower scores broaden the range of related results.

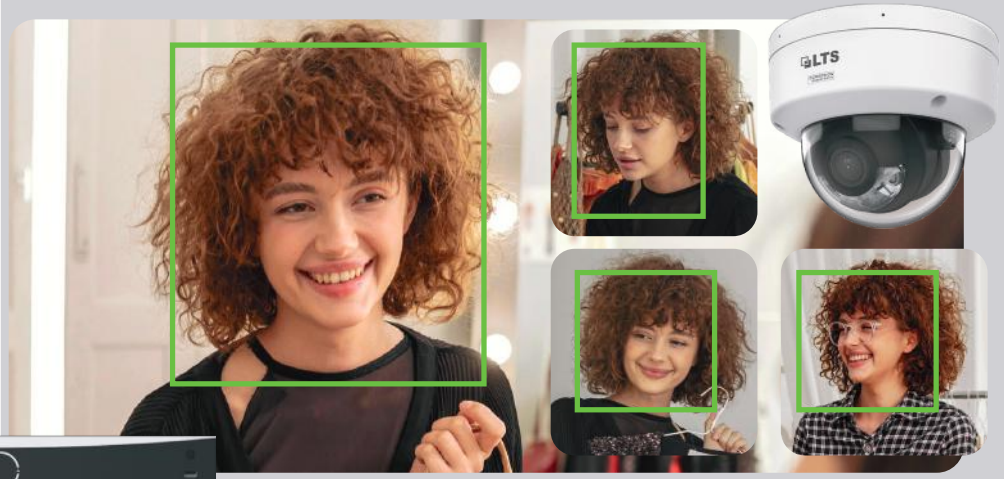
Direct-Search 3.0

Instant Suspect Tracking at the Click of a Button

Direct-Search

With the new direct-search software, track targets accurately and quickly. The NVR reads the metadata pulled from the cameras and locates similar subjects within the search results, making it easy to find your subject of interest.

Your Gatekeeper Against Unauthorized Access

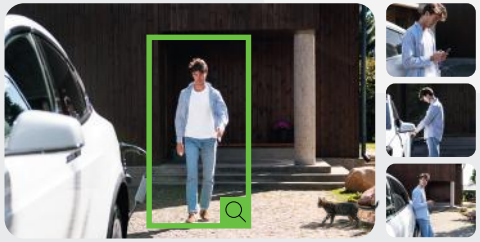


Facial Recognition

The NVRs pull data from the AI Color 24/7 Cameras to alert you when unauthorized visitors are onsite. This technology is perfect for ensuring the safety of your home, property, and business.

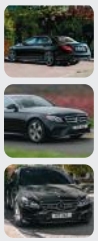
Note: These two features cannot work simultaneously.

Track Your Suspects Easily



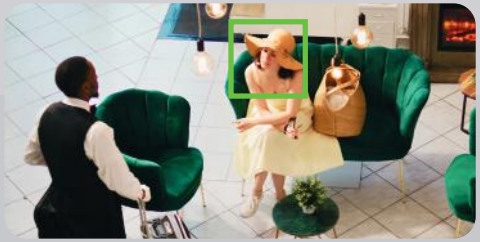
Say goodbye to manually digging through footage to find your perpetrator. Use Direct-Search to select a target in a given frame and expand the search through all the footage for similar subjects in minutes.

Vehicle Tracking



This software works with your camera system to help track vehicles entering your property.

Screen Your Visitors



The facial recognition feature alerts you based on the database of allowed and blocked lists of individuals. For example, the system will notify you when VIPS on the permitted list enter the premises.

Enhanced Monitoring Across Every Channel

The NVR leverages facial recognition technology across multiple channels to instantly alert you to security threats, such as individuals on a blocked list. This streamlined approach reduces costs by eliminating the need for real-time monitoring of each channel individually.

Note: Requires compatible camera models

Invest in Care, Skip the Repair

With powerful strobe lights, and two-way audio, TVI cameras are proactive against break-ins, significantly minimizing the need for costly property repairs. TVI cameras require compatible DVR models for MD 2.0 Human/Vehicle Detection.

Active Deterrence

This camera flashes red and blue strobe lights to deter intruders once they enter the detection zone proactively.

Two-Way Audio

If you encounter loiterers or personnel, you can use the two-way speakers to communicate and discourage access.

180° Coverage

In addition to the strobe lights, these cameras have 180° coverage to monitor every angle—because total awareness means total protection.

VCA with Human & Vehicle Detection

When paired with compatible DVRs, our cameras deliver enhanced detection accuracy—effectively distinguishing between relevant and irrelevant motion to minimize false alarms.

UBNT-PBE-5AC-ISO-GEN2	5GHz WiFi bridge with a 450+ Mbps real TCP/IP throughput rate and enhanced surge protection.	$135
UBNT-RD-5G30	5 GHz, 30 dBi or 34 dBi high-performance dish antenna.	$149
UBNT-RP-5AC-GEN2	High-performance 5GHz basestation for PtMP or PtP links. Provides up to 500+ Mbps data throughput.	$249

Antennas and Accessories

UBNT-AMO-5G10	5 GHz, 10 dBi carrier-class 2x2 dual-polarity MIMO omnidirectional antenna.	$125
UBNT-AMO-5G13	5 GHz, 13 dBi carrier-class 2x2 dual-polarity MIMO omnidirectional antenna.	$165
UBNT-ETH-SP-G2	ESD protection for outdoor high-speed networks.	$13
UBNT-UB-AM	Universal mounting bracket for wall-mount flexibility.	$9
UBNT-NS-WM	Window mount for NanoStationM airMAX devices.	$19
UBNT-ACB-ISP	Low-cost home WiFi access point made to interoperate with airMAX CPE devices, with remote management by UISP.	$29
UBNT-ACB-AC	High-performance home WiFi access point made to interoperate with airMAX CPE devices, with remote management by UISP.	$79

UniFi® Wifi

UBNT-U7-PRO	Ceiling-mounted WiFi 7 AP with 6 spatial streams and 6 GHz support for interference-free WiFi in demanding, large-scale environments.	$189
UBNT-U7-PRO-MAX (NEW)	Ceiling-mounted WiFi 7 AP with 8 spatial streams, 6 GHz support, and a dedicated spectral scanning engine for interference-free WiFi in demanding, large-scale environments.	$279
UBNT-U7-OUTDOOR (NEW)	All-weather WiFi 7 AP with 4 spatial streams, an integrated directional super antenna, and versatile mounting options.	$199
UBNT-U7-PRO-WALL (NEW)	Wall-mounted WiFi 7 AP with 6 spatial streams and 6 GHz support tailored for home builders with seamless installation options.	$199
UBNT-U7-LITE (NEW)	Wall-mounted WiFi 7 AP with 6 spatial streams and 6 GHz support tailored for home builders with seamless installation options.	$99
UBNT-U7-IW (NEW)	Wall-mounted WiFi 7 AP with 4 spatial streams and an integrated 2.5 GbE PoE switch designed for hospitality environments. Note. PoE+ input required for single-port PoE output.	$149
UBNT-U6+	Compact, ceiling-mounted WiFi 6 AP with 4 spatial streams that improves upon the U6 Lite with higher performance and dual-band WiFi 6 support. Ideal for small and medium-sized businesses.	$134
UBNT-U6-PRO	Ceiling-mounted WiFi 6 AP with 6 spatial streams designed for large offices.	$169
UBNT-U6-MESH	Sleek, indoor/outdoor WiFi 6 AP with 6 spatial streams designed for mesh applications.	$189
UBNT-U6-MESH-PRO	Indoor/outdoor WiFi 6 AP with 4 spatial streams, an integrated super antenna, and a gigabit passthrough port.	$204
UBNT-U6-IW	Wall-mounted WiFi 6 AP with 6 spatial streams and a built-in 4-port switch ideal for single-room coverage in hospitality environments.	$184
UBNT-U6-ENTERPRISE-IW	Wall-mounted WiFi 6E AP with 10 spatial streams, 6 GHz support, and a built-in 4-port switch. Designed for high-density office networks.	$319
UBNT-U6-LR	Ceiling-mounted WiFi 6 AP with 8 spatial streams and extended signal range.	$189
UBNT-U6-ENTERPRISE	Ceiling-mounted WiFi 6E AP with 10 spatial streams and 6 GHz support to provide seamless, multi-band coverage within high client density environments.	$289
UBNT-UAP-AC-M	Compact, indoor/outdoor WiFi 5 AP with 4 spatial streams and optional external antenna support for directional coverage.	$99
UBNT-UAP-AC-PRO	Ceiling-mounted WiFi 5 AP with 6 spatial streams designed for large offices.	$149
UBNT-UAP-AC-HD	Ceiling-mounted WiFi 5 AP with 8 spatial streams designed to support high-density networks and critical system applications.	$349
UBNT-UAP-AC-SHD	Ceiling-mounted WiFi 5 AP with 8 spatial streams designed to support high client density environments.	$549
UBNT-UBB	A 60 GHz wireless point-to-point bridge with 10G SFP+ uplink for maximum performance.	$499
UBNT-UBB-XG	A 60 GHz wireless point-to-point bridge.	$999
